

INSECT REPELLENT WITHOUT DEET MYTHS VS. FACTS

Bugs, including mosquitoes, ticks, and some flies, are the perfect carriers of a number of diseases. Many of these diseases cannot be prevented with a vaccine or medicine so it is imperative to take precautions when working outdoors for any length of time.
Get the facts and solutions on insect repellent!

MYTH: Outdoor workers are advised to wear insect repellent regardless if it contains DEET or not.

FACT: Manufacturers of flame-resistant fabrics are warning that insect repellents containing DEET may be flammable and reduce the fabric's thermal protective properties and therefore recommend avoiding insect repellents containing DEET. Their protective equipment is designed to keep them safe and now there is a naturally derived, nonflammable DEET FREE insect repellent that works at keeping them safe from infectious insects. Bug X FREE is industrial strength but safe to use with FR clothing while being convenient and easy to apply.

MYTH: There are no effective, natural insect repellants available to the outdoor worker.

FACT: Bug X FREE is a naturally derived, plant-based DEET FREE insect repellent that works just as effectively as its DEET counterpart. It's the perfect solution when FR clothing is being worn but also for the individual seeking a more natural insect repellent solution. From single dose towelettes to sprays and even a wrist band, it's the best natural DEET FREE Insect Repellent Skin Care Solution!

MYTH: There are no long-lasting natural, organic solutions to repelling insects.

FACT: New to the CoreTex line is the BugX 48 Patch which provides 48 hours of natural protection through a transdermal patch. This 100% organic product supplies the body with a healthy dose of Vitamin B1 which courses throughout the entire body and is excreted through the pores to repel insects from head-to-toe. The unique patch utilizes the natural benefits of Vitamin B1 through a thermal based patch that directly

supplements the bloodstream with a steady delivery that ultimately provides complete head-to-toe protection from most biting insects. It's safe with FR clothing and has no mess or odor with the most convenient total body protection. The future of natural insect repellent is here!

MYTH: Insect repellent is only needed on exposed skin to be effective.

FACT: For maximum protection, all areas should be covered by an insect repellent whether that is exposed skin or clothing. Bug X FREE is conveniently packaged into single dose towelettes for easy application on the skin along with a spray to provide protection and repel insects off of clothing. CoreTex Products has you fully covered and protected!

MYTH: It is the sole responsibility of all outdoor workers to obtain insect protection.

FACT: Per OSHA Rules 1926.28(a) and 1910.132, it is the responsibility of the employer to develop and implement a Skin Protection Wellness Program that provides the employee protection from all known environmental hazards. More and more risk management and human resource teams in the American Workforce are exploring ways to develop safe, effective and affordable Skin Protection Wellness Programs. CoreTex Products offers a complete line of complementary skin protection products specifically formulated to keep employees protected while working outdoors. This includes everything from sunscreen and lip balm to poison ivy barriers & cleansers and insect repellent protection to an antibacterial hand sanitizer. Not only are these products of the highest quality available, they were developed to meet or exceed all government standards including FDA, EPA and O.S.H.A.
